Notes:

- The cursor must be active (flashing) in the Visual Editor to use WP hotkeys.
- Hotkeys can be quirky in some browsers and may default to browser shortcuts or not work at all. Wah.
- To Undo shortcut, press Esc or Ctrl+Z.
- Right Column (WP ver 4.2+): Type the shortcut character(s) first, then the text, then press Enter or the spacebar as indicated.
- Don't have this list handy? Press ? in the Visual Editor toolbar.
